AIM: FML

Frontier Mining Ltd (“Frontier” or “the Company”)

Alexander Rasokhin joins Frontier as Chief Geologist

The Company is pleased to announce that Mr. Alexander Rasokhin has recently joined Frontier as Chief Geologist of its wholly owned subsidiary, FML Kazakhstan LLP.

Mr. Rasokhin has over 30 years of experience in gold and copper exploration in Kazakhstan and neighbouring countries. Mr. Rasokhin joins Frontier from Rio Tinto Mining and Exploration Ltd. where he has held the position of Chief Geologist focusing on the exploration of copper-porphyry and gold targets in central Kazakhstan. Prior to his role for Rio Tinto, Mr. Rasokhin worked as Chief Geologist for Newmont Mining’s exploration projects in Central Asia exploring copper-gold porphyry and epithermal gold-silver deposits in central Kazakhstan and sedimentary hosted gold deposits in eastern Kazakhstan.

Brian Savage, Chairman and Chief Executive Officer of Frontier, commented: “We are delighted that Mr. Rasokhin has decided to join Frontier as a geologist of his calibre will be a great asset to the Company. Mr. Rasokhin brings a wealth of experience, gained throughout his long career working for the major mining companies on the exploration of gold and copper projects in Kazakhstan and other CIS countries. We are looking forward to harnessing his expertise and advancing our existing projects as quickly as possible.”

About Frontier

Frontier Mining Ltd. is a mineral exploration and development company that was incorporated in the state of Delaware, USA, on August 5, 1998 for the purpose of exploring and developing gold and copper deposits in the Republic of Kazakhstan. Through its subsidiaries and affiliates, Frontier locates, evaluates, acquires, explores and develops mineral properties.

Frontier has two licenses owned by its wholly owned subsidiaries in Kazakhstan. They are the Naimanjal exploration and mining licence, held by FML Kazakhstan, and the Baltemir exploration licence, held by Baltemir LLP. Frontier has one producing gold mine, Naimanjal; one pre-feasibility stage gold project, Koskuduk; and one exploration stage gold prospect, Baltemir. Naimanjal is forecast by management to produce 25,000 ounces of gold in 2006 at a cash cost of \$250 per ounce. Frontier currently intends to double its gold production to 50,000 ounces in 2007 and double it again to 100,000 ounces in 2008. Management believes its gold projects contain more than two million ounces of oxide gold resource.

Frontier also has one pre-feasibility stage copper porphyry deposit with associated gold and molybdenum, Baitimir; and several copper/gold prospects along a 25-km trend including both VMS and porphyry types. Metallurgical tests on its Beschoku and Yubileiny copper projects confirm the oxide copper ore is amenable to extraction using low cost SX-EW technology. Management believes the copper projects contain more than 1,000,000 tonnes (2.2 billion pounds) of copper (P1) resource with significant potential for increase. Frontier is currently evaluating acquisition opportunities in uranium, gold, and copper in Kazakhstan and the CIS countries.

Frontier shares are traded on the AIM market of the London Stock Exchange. Frontier has 89,209,931 ordinary shares issued and 10,723,747 outstanding options and warrants, giving 99,933,678 fully diluted ordinary shares.
